President's Message

by Tanya Morrison

Kia Ora everyone and welcome to this edition of our members newsletter. A hearty welcome to all of our new members, great to have you on board and part of our institute. Thank you again to all members who attended our Annual General Meeting via zoom on Friday 25 September.

Do you have an interesting case study, area of work or piece of research that you would like to share and present at our Professional Development Conference being held in Dunedin, 23-25 March 2027? If yes! Abstracts are now open (see information flyer later in this newsletter). Registrations will also be opening very soon so keep an eye on your inbox for the official announcement. To find out more about our conference and discounted accommodation offers - visit our website via the link below!

<https://nzieh.org.nz/our-conference>

I recently had the privilege of attending the CIPHI Annual Education Conference in St Johns, Canada (four flights and nearly two days of travel!) I thoroughly enjoyed delivering two presentations and connecting with like-minded Environmental Health Practitioners throughout the week-long conference and events programme. A few pics from the conference to follow.

NZIEH recently held our National Webinar series, a free of charge virtual training offering for members. The 2 x 2 hour webinars were held over two consecutive days attracting a great audience both days with engaging Q&A sessions.

Our recent ECHANZ collaborative webinar held on 8 July for Plastic Free July was very insightful with excellent presentations. See later in the newsletter for a re-cap on this webinar and other activities that took place for Plastic Free July. We now look forward to delivering the final ECHANZ webinar for 2026 on 2 December for World Soil Day.

World Environmental Health Day on 26 September is always a significant date for our profession. This year's theme 'Standing with science to protect communities' inspired the national executive team to provide a competition to all primary, intermediate and secondary schools to identify 'science in action'. With record numbers of entries from all around NZ, we were delighted to see young people of all ages learning about environmental health. We sincerely thank our friends at Enviroschools for sharing our competition to their large network of Schools and to you, our members, for sharing with your families and Schools. Competition results have been announced via member email and on our facebook page with a copy of the results to follow. Also to celebrate World Environmental Health Day, NZIEH facilitated an inaugural IFEH Asia-Pacific region collaborative webinar with four international guest presenters held on 23 September. This generated a lot of interest in the region with nearly 200 registrants. A re-cap of this webinar is also later in the newsletter.

President's Message continued....

With spring already upon us, it's hard to believe we're beginning the countdown to the end of another year. National Vice President, Deirdre O'Grady and myself are looking forward to attending the EHA Professional Development conference in Canberra in October and connecting with our EH colleagues across the ditch. As the pace inevitably picks up over the coming months, please remember to look after yourselves and make time for your own wellbeing.

We also welcome your ideas and feedback on any additional training, resources, or support that the Institute could provide to assist you in your day-to-day roles. Our inboxes are always open, so please don't hesitate to reach out. Until next time, on behalf of the National Executive, we remain committed to being your voice for Environmental Health across New Zealand.

Nga mihi,

Tanya

Tasman/Marlborough Branch event re-cap

by Karen Winter

The Tasman/Marlborough Branch of the Institute recently enjoyed an informative and engaging Branch Day, combining a fascinating site visit to one of the region's successful food manufacturers with a practical training session on trade waste management.

From Raw Fruit to International Markets

The morning was spent at Annie's, where members were given a behind-the-scenes tour to see how locally sourced raw fruit is transformed into the fruit bars that are enjoyed throughout New Zealand and exported around the world. The visit showcased the impressive journey from fresh fruit to finished product. Members observed the fruit being emulsified into a smooth puree before undergoing a low-temperature drying process lasting approximately 36 hours. This careful dehydration process reduces the product to a target water activity of between 0.5 and 0.7, helping to ensure both product quality and safety while maintaining the fruit's natural characteristics. A key highlight of the tour was seeing the company's Critical Control Points in action. These controls form an essential part of the food safety system and provide assurance that the finished product is safe for consumers. What stood out most, however, was the highly hands-on nature of the operation. As a family-owned business, Annie's demonstrated a genuine passion and pride in their products and their commitment to making quality healthy snacks made an impression.

Grease Trap Masterclass

Following lunch, members participated in a highly informative Grease Trap Masterclass delivered by Marlborough District Council's in-house Trade Waste Officer. The session explored the various types of grease traps commonly used by food businesses, how they function, and the importance of regular maintenance to ensure fats, oils, and grease are effectively managed before entering the wastewater system. Attendees gained valuable insights into good maintenance practices, common issues that can arise, and the role grease traps play in protecting both public infrastructure and the environment. The practical nature of the presentation was particularly appreciated by the team, providing a stronger understanding of grease trap operation and maintenance requirements. This enhanced knowledge will assist officers when undertaking food business verifications and discussing trade waste management obligations with operators.

A Valuable Day of Learning

The Branch Day provided an excellent opportunity for members to expand their knowledge across two important aspects of environmental health practice: food manufacturing and trade waste management. The combination of an industry site visit and technical training made for a valuable professional development experience, and the Tasman/Marlborough Branch thanks both Annie's and Council Staff for generously sharing their expertise.

Tasman/Marlborough Branch event re-cap by Karen Winter

National webinar series re-cap

The 2026 National webinar series was held on 1 & 2 September with a high number of registrants each day. Day one opened with Dr Farnaz Pourzand from the Department of Public Health at the University of Otago. Dr Farnaz' presentation was titled 'Unsafe Waters? The hidden Campylobacter risk in rural New Zealand: What epidemiological evidence tells us about private drinking water supplies. Following on from this interesting presentation was Professor Miranda Miroso and Professor Phil Bremer from the Food Safety Culture Lab, University of Otago. Their presentation 'When the Inspector Walks Out - Verifying for Resilient Human Systems in Food Safety was insightful and engaging prompting a lot of Q&A!

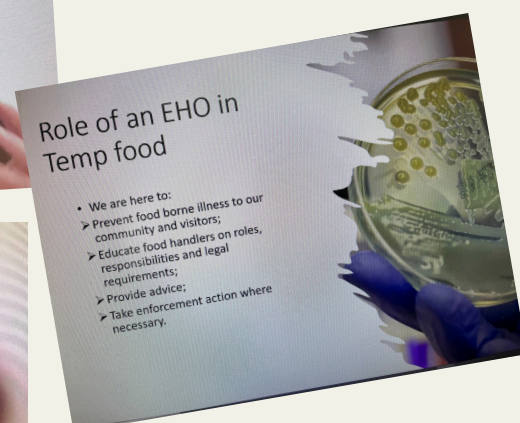

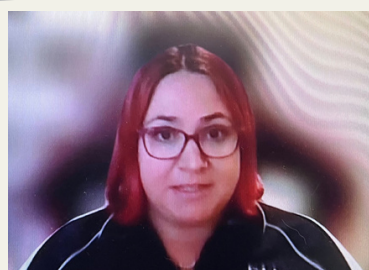

Day two opened with Peter Wood from Taumata Arowai presenting on 'The Drinking Water Regulatory Regime' providing updates and answering many of our members' questions in a lively Q&A session. Lisa Hughes from GTK Consulting, Australia concluded the series with an interesting presentation 'From Chaos to Compliance: Running Safe Large-Scale Food Events. The recordings for both days can be viewed by logging into your myNZIEH account.

Taumata Arowai whakataukāki

Ko te wai ahau, ko ahau te wai.
He whakaaturanga tātau nō te wai.
Ko te ora te wai ko te ora o te tangata.
He taonga te wai me tiaki.
Ko wai tātou.
Ko wai tātou.

I am water, water is me.
We are reflections of our water.
The health of the water is the health of the people.
Water is a treasure that must be protected.
We are water.
Water is us.

World Environmental Health Day School's Competition WINNER!

NZIEH 'Science in Action to protect communities' competition

NZIEH would like to thank all students, parents and Schools for getting involved and encouraging participation in this competition. With a record number of fantastic entries listing all of your observations of 'Science in Action' - our National President had a tough decision determining the most outstanding winning entry.

Winner:

Sarcha Anderson – St Matthew's Collegiate School

**Prize: Student receives a \$50 Prezzy card, certificate
and a \$200 donation for their School**

Highly Commended:

(Student receives a certificate)

- Pippa Tomlinson – Ormond School
- Room 8 – Mangapapa School
- Fleur Hickling – Ilminster School
- Seraiyah Matene-Ngaira – Ilminster School
- Avalon Coles – Masterton Intermediate
- Darragh Evans – Masterton Intermediate
- Kora Apiata – Masterton Intermediate

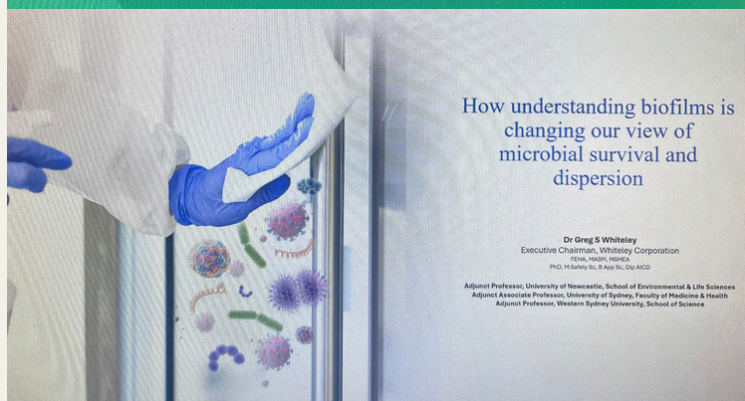

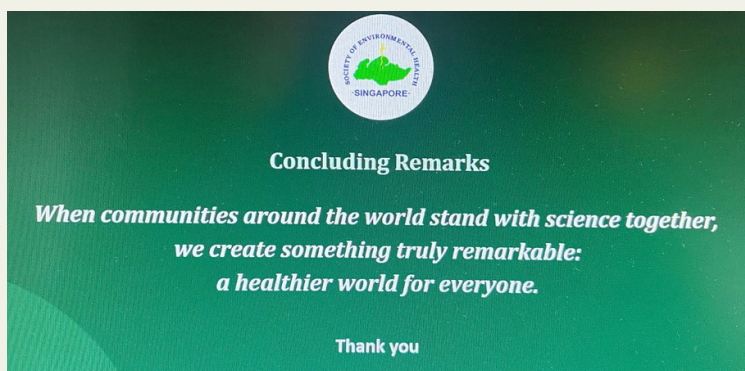

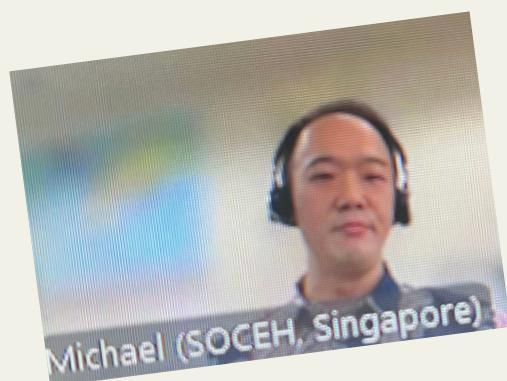

Enviroschools

**A BIG THANK YOU to our friends at
Enviroschools for sharing our competition
via their school network.**

World Environmental Health Day webinar re-cap

NZIEH facilitated the inaugural IFEH Asia-Pacific Region collaborative webinar held on 23 September to acknowledge and celebrate World Environmental Health Day. Hosted by NZIEH National President and IFEH President-Elect Tanya Morrison along with EHA National President and IFEH Honorary Secretary Melissa Burn. The hosts moderated four speakers from across the region who presented short 10 minute talks on topics relating to the 2026 theme 'Standing with Science to protect communities'. With nearly 200 EH colleagues from across the region pre-registering for this event it highlighted the interest in these collaborative events and the IFEH Asia-Pacific regional team look forward to planning more in the future.

Plastic Free July webinar re-cap

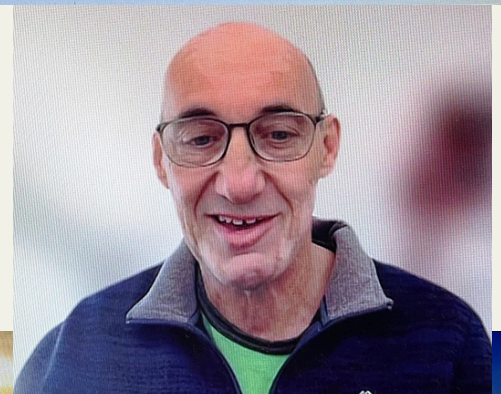

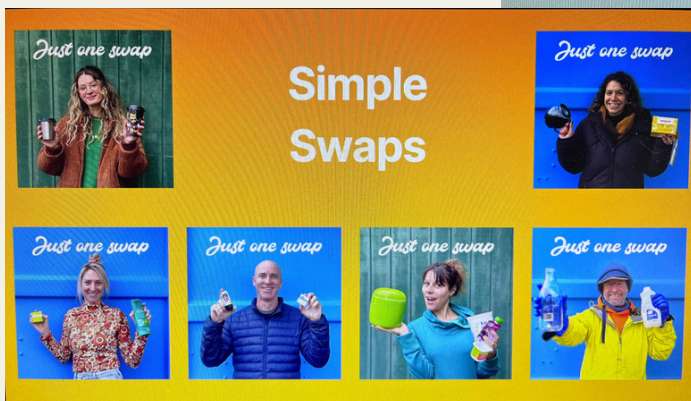

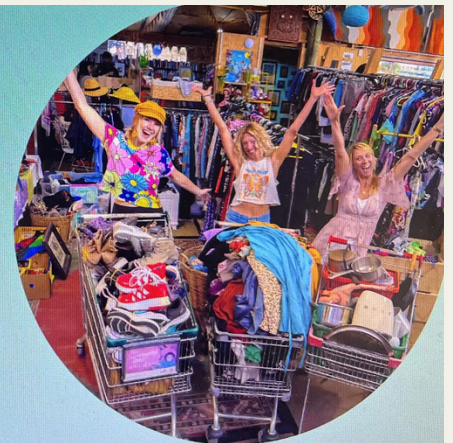

For Plastic Free July we held an EHANZ Plastic Free July webinar - hosted by NZIEH and EHA National Presidents Tanya Morrison and Melissa Burn. Guest Presenters Sophie Ward (NZ) Impact Development Manager from Wanaka Wastebusters and Dr Scott Wilson (Australia) a leading environmental scientist with more than 25 years' experience in ecotoxicology, pollution monitoring and ecological assessment. Thank you to everyone who attended the live webinar and participated in the Q&A sessions. Don't forget if you missed the webinar you can find the recording in the training resources folder of your myNZIEH account.

Wastebusters in Wānaka

We are a community enterprise leading the way to zero waste.

We educate, engage and keep resources in circulation to accelerate behaviour change and environmental actions.

Plastic Free July Competition winner!

The Queenstown Lakes District Council EH team were the winners of the Plastic Free July competition. This was their winning entry:

"We ventured to one of our favourite places – Wastebusters Wānaka on a mission to reduce our plastic footprint and hopefully increase our chances in the competition. We tracked down Sophie, who presented at the NZIEH Plastic Free July webinar - Insights from Wastebusters PFJ Campaigns, and officially committed our plastic free July goals by entering the Wasties draw.

Our goals included ditching disposable cups, avoiding bottled drinks, buying food in bulk, and choosing natural (and second-hand) fabrics. Some goodies we got second hand at Wasties were an Easiyo machine to make yoghurt at home and reduce packaging, a wool sweater, a reusable drink bottle and decorations for our upcoming mid-winter Christmas party.

We also got to learn about a product being made out of recycled tetra packs, it's called saveBOARD and is a building alternative to gib board. Seeing a waste product transformed into a building material was a real eye-opener. We are inspired and are taking it back to our Council waste team to explore whether we can recycle the oat milk cartons used across the organisation. Who knew our morning coffees might one day help build a wall?"

*Fantastic
effort!*

Disclaimer: Not everyone could make it on the same day, so the ladies with a halo were inserted with the help of AI....

The prize was a morning tea shout so we asked the team to let us know where they went to celebrate!.... *"We went to Balls & Bangles for morning tea/brunch last Friday with our prezzy card. It was delish, and the bagels come on a single piece of paper so very plastic free!"*

Plastic Free July by the National Executive team

- Karla ditched the small non recyclable yoghurt pottles from the daily lunchboxes and purchased the large yoghurt containers to fill small reusable containers each day instead. Karla also replaced plastic cooking utensils she had with all wooden utensils.
- Bobbi ran out of laundry powder so instead of buying the liquid wash in the plastic container from the supermarket, she picked up a 5kg bulk cardboard box of Persil powder from Mitre 10 when she was there. Bobbi also buys the large yoghurt and reports that it's also cheaper!
- Stephen used a keep cup for his coffee.
- Varsha reduced her single-use plastic waste by switching from individually wrapped tea bags to loose-leaf tea and used a reusable tea infuser. It was a simple change that significantly reduced the amount of packaging waste generated from her daily cups of tea.
- Karen moved to using recyclable bags for when she buys fruit/vegetables from the supermarket.
- Tanya is a big user of her keep coffee cup. *"I try really hard to not have a takeaway coffee if I don't have my cup with me. No cup, no coffee!"*
- Jess said Plastic Free July reminded her to continue to focus on the habits she already does such as using loose leaf tea rather than individually wrapped bags, bringing her own container to buy sushi as well as using her own reusable chopsticks. One new thing she did try was buying bulk foods i.e., lentils, beans, rice and dish liquids in reusable containers rather than supermarket packaging.
- Veena decided to focus on reducing microplastics in her food. Recently, she watched the Netflix documentary The Plastic Detox and found it quite confronting. One change she made is transitioning from plastic chopping boards to wooden ones. Rather than sending the old chopping boards to landfill, she has repurposed them around the house. They now serve as protective surfaces on the dining table and workbench. Veena also makes her own soaps to replace the plastic bottles in the bathroom.

Plastic Free July innovation!

One of our innovative members makes her own laundry liquid and has kindly shared her recipe with us below. Thank you Jo!

What You Need

- 1/2 bar (about 70g) of Castile or vegetable-based soap (such as Sunlight soap or Dr. Bronner's)
- 1.5 litres of water (first quantity)
- 1/2 cup washing soda (soda ash / washing crystals)
- 1/4 cup borax (or borax substitute)
- 1 litre of hot water (plus an extra 5 litres of hot water for the bucket)
- 20 drops of essential oil (optional: lavender or eucalyptus)

• Laundry •

How to Make It

- **Grate the soap:** Finely grate your bar of soap into a saucepan.
- **Heat and dissolve:** Add the 1.5 litres of water and heat on low. Stir until the soap melts completely.
- **Add powders:** Stir in the washing soda and borax until dissolved. Remove from heat.
- **Dilute in a bucket:** Pour 1 litre of hot water into a large bucket and mix in the soap solution.
- **Add more water:** Add another 5 litres of hot water and stir well.
- **Bottle and set:** Pour the mixture into old clean bottles or milk jugs. Leave for 24 hours to set into a thick liquid/gel.
- **Use:** Shake well before each use. Use about 1/3 of a cup per

2027 PROFESSIONAL DEVELOPMENT CONFERENCE

23-25 MARCH 2027

TŪHURA OTAGO MUSEUM, DUNEDIN

CALL FOR ABSTRACTS

THEME: 'EMERGING THROUGH CHANGE'

ADAPTING ENVIRONMENTAL HEALTH FOR TOMORROW

Submission Deadline **20 October 2026**

TOPICS

Conference topics include (but are not limited to):

- ✓ Food
- ✓ Water
- ✓ General Environmental Health
- ✓ Noise
- ✓ Technology / Advancement of the profession
- ✓ Other - please specify within submission

ABSTRACT GUIDELINES

- Plenary/Oral Presentation
 - 20 or 30 minute presentation (please state option preferred)
 - 5-10 minutes for discussion and questions (in addition to above time)
- Maximum of 300 words to outline the important points of the presentation and highlight the content to be communicated. Include (as relevant) the aims, methods, results and conclusions of the work, research, project or case study.
- Abstracts should not include tables, figures or references.
- Presentation title to be brief and in keeping with the theme.
- All presenters to be listed, followed by presenters organisation.
- Presenters name to be stated with full contact details included.
- Terms and Conditions: All abstracts must be original work. The author/presenter is responsible for the accuracy of the abstract. Presenter will receive a full complimentary conference registration. By submitting an abstract you give consent to publication of the abstract in conference materials including social media.

KEY DATES

20 October: Abstracts close
10 November: Notification to Presenters
20 November: Presenter acceptance
1 December: Draft Programme

Email your submission:

info@nzieh.org.nz

For further conference info visit:

IFEH update report

Kia Ora NZIEH members,

On behalf of the International Federation of Environmental Health, I am pleased to share a brief update on recent activity across the federation.

Although I am still new to the role of President-Elect, the first few months have been busy and rewarding. I have been learning more about where the federation is at, identifying priorities, and considering how we can best support the valuable work our members do across the globe.

The federation has recently established several working groups, including Women in Environmental Health, a Codex working group for international food standards, and a governance and finance committee to support efficient and effective federation procedures. These groups draw on the knowledge and expertise of our members, helping ensure the federation remains guided by members, for members. The Women in Environmental Health networking group will meet for the first time later this month to agree priorities and explore initiatives to raise the profile of women in our profession.

Information will soon be shared about the federation's review of its procedure's manual. The current manual is lengthy and has not been reviewed for some time. All member organisations will be invited to provide feedback through a multi-month engagement process, and I encourage you to take part so the federation continues to serve all members well.

IFEH has also had recent international representation, with my attendance at the Canadian Institute of Public Health Inspectors conference in St John's, Newfoundland, Canada, and David Nemaconde, African Regional Chair, representing IFEH at the World Federation of Public Health Associations (WFPHA) congress in Cape Town, South Africa. These opportunities help strengthen global networks, promote our profession, and build partnerships that support knowledge-sharing and collaboration. The next WFPHA World Congress will be held in Auckland, New Zealand, in 2028.

The federation is also working to increase its social media presence across Facebook, X, and LinkedIn. We are always keen to celebrate and promote the excellent work of our members worldwide. If you have a good news story to share, please contact me directly at tanya@nzieh.org.nz.

Finally, World Environmental Health Day is 26 September 2026. The Asia-Pacific region hosted an open webinar to celebrate on Wednesday 23 September 2026. This was a valuable opportunity to pause and recognise the important work we do collectively - work that is often unseen but essential to the health and wellbeing of our communities. On behalf of the federation, thank you for your continued commitment to our profession. We look forward to ongoing connection with you and working alongside members across the globe.

Nga mihi,

Tanya Morrison

IFEH President-Elect

National President – New Zealand Institute of Environmental Health

Kia ora colleagues, warm greetings from Australia. As we welcome the arrival of Spring and the renewed energy it brings to our communities, it is a pleasure to once again connect with our environmental health whānau across the Tasman. September is a particularly meaningful month for our profession as we prepare to celebrate World Environmental Health Day (WEHD) on the 26th - a global acknowledgement of the essential role Environmental Health Officers play in protecting public health and supporting resilient, thriving communities.

This year's WEHD theme, Environmental Health: Standing with Science to Protect Communities, speaks directly to the heart of our work. Environmental health is fundamentally evidence-based and grounded in practical science, and every day EHOs translate complex technical knowledge into real-world outcomes, whether responding to emerging risks, supporting safe food systems, managing environmental hazards or guiding community preparedness. It is, quite simply, science in action.

I was thrilled to mark the occasion with New Zealand and the IFEH Asia and Pacific Region hosting a dedicated webinar exploring the theme and highlighting regional perspectives on environmental health leadership and innovation.

This compliments our continued international partnership since we delivered a successful Plastic Free July EHA NZ webinar, showcasing practical approaches to waste reduction, regulatory innovation and community engagement. Looking ahead, preparations are underway for our World Soil Day webinar in December, where we will explore soil health, contamination management, land use planning and the intersections between environmental health and sustainable development. These shared learning opportunities remain a powerful example of what we can achieve together across jurisdictions.

Next month, we gather in Canberra for the 48th Environmental Health Australia National Conference, held from 20–22 October 2026. This year's event is especially significant as we celebrate 90 years of Environmental Health Australia, a milestone that reflects the strength, resilience and evolution of our profession. We warmly welcome our New Zealand colleagues to join us for this important occasion as we reflect on our history, recognise our achievements and look ahead to the future of environmental health across Australia and beyond and I look forward to seeing those of you who can join us

Melissa Burn
EHA National President

Styles Group Acoustic & Vibration Consultants - For all of your noise consulting and training needs contact: daniel@stylesgroup.co.nz

StylesGroup

Acoustics & Vibration Consultants

Robust. Accurate. Experts.

Our core work is environmental noise and vibration consulting. We also have specialised knowledge and experience in compliance and enforcement, including noise and vibration monitoring, expert evidence, analysis, drafting formal enforcement documents, training environmental health and enforcement officers, and noise contract management.

Policy and Resource Consents

Advice on policy, District Plan changes and reviews, NES and NPS implementation

Full acoustic assessments for any project, including major infrastructure and major development

Review of resource consents, acoustic reports, and management plans.

Development and review of effective and enforceable resource consent conditions.

Monitoring and Compliance

Noise and vibration measurements for compliance and monitoring.

Assist EHO's and compliance officers with noise complaint investigation plans with a view to achieving resolution.

Enforcement Strategy

Development of an organisational response framework for compliance, monitoring and enforcement functions.

Support with enforcement action, including abatement and infringement notice drafting.

Noise contract management and excessive noise complaint enforcement.

Training

Full or half-day noise training options for EHO's and compliance officers, including sound level measurements, s16, NZS standards, rating level calculations, mitigation, enforcement, and case studies.

Contact Daniel Winter to discuss your training requirements. We can tailor training options that are specific to your needs. E: daniel@stylesgroup.co.nz
